

ADOBE PDF **FEATURE 3**

How to Create Tooltips

- STEP 1:** If necessary, choose Forms > Add or Edit Fields, and make sure that the Select Object tool is selected.
- STEP 2:** Double-click a selected form field to open the Properties window.
- STEP 3:** In the General tab, type a description into the tool tip box. The Tooltip also displays text that users may find helpful in filling in the form field. Tooltips appear when the pointer hovers briefly over the form field.
